

OneGodian Frequency Standard™

Primary Frequency:

432 Hz

Designation: Unity / Source Alignment Frequency

Official Statement

The OneGodian system designates 432 Hz as its primary harmonic reference, representing unity, source alignment, grounding, and foundational coherence.

This frequency is applied across audio outputs, thematic systems, and experiential frameworks to maintain consistency, alignment, and structural integrity.

Functional Definition

432 Hz represents:

- Unity
- Source
- Origin
- Grounding
- Foundational balance

Genre Integration Standard

The 432 Hz frequency standard is applied across multiple musical formats to ensure accessibility, cultural reach, and creative flexibility.

Supported Genres:

- Afrobeats
- Amapiano
- K-Pop
- Trap
- Tribal / Indigenous-inspired rhythmic compositions

These genres may be used individually or in hybrid form while maintaining 432 Hz tuning as the core harmonic reference.

Implementation Scope

The 432 Hz standard applies to:

- Audio productions (music, meditation, sound design)
- Monthly calendar-based releases (13-month system)
- Digital products and downloadable content
- Cultural and thematic audio experiences
- Media, branding, and immersive environments

Technical Positioning

- 432 Hz = Primary system frequency (required for alignment products)
- 440 Hz = Secondary (compatibility only, not branding)
- Genre selection does not override frequency standard

Compliance Note

This standard is defined as:

- a system-level harmonic framework, and
- a design and branding choice within the OneGodian ecosystem

It is not presented as a universal scientific constant.

Short Version (For UI / Products)

OneGodian Frequency Standard™: 432 Hz

Unity • Source • Grounding • Alignment

Genres: Afrobeats • Amapiano • K-Pop • Trap • Tribal
