

Gregory Lamar Jones is the founder and author of the ONEGODIAN framework, with foundational authorship dating to 2009 and business development through ONEGODIAN, LLC, established in Connecticut on April 11, 2018. He later developed the OneGodian Algorithm™, a structured AI-era framework for identity recognition, alignment, and intelligent system interaction. His current work focuses on converting the OneGodian body of work into membership infrastructure, educational products, AI governance tools, and documented digital systems.

ONEGODIAN is a founder-authored identity and AI governance ecosystem built for the age of intelligent systems. Its immediate business focus is membership, education, digital products, and AI identity governance tools. Its long-term technical direction is the OneGodian Algorithm™, Belief Mapper, Protocol API, and Agent Authority Model. Its institutional posture is documented, versioned, voluntary, and legally disciplined.
